Education

Queen's University Kingston, ON
B.Comp in Computer Science, Minor in Mathematics *Expected April 2027*

- Related Coursework: Data Analytics, Data Structures & Algorithms, System Level Programming, Discrete Structures, Software Quality Assurance, Database Management, Software Architecture, Computer Networks

Experience

Pharmacy Support Assistant May 2024 - Present
BioScript Solutions *Moncton, NB*

- Monitor and track **200+ medication shipments daily**, using **internal systems** to log shipment data and flag delays
- Coordinate with couriers, depots, and patients to **proactively** resolve delivery exceptions and maintain continuity of care

Junior Developer Dec. 2022 - Jun. 2023
Area52 *Moncton, NB*

- Contributed to the design of a cloud-based diagnostic service on **AWS** that monitored industrial machines across **7 client companies**.
- Designed and queried a **SQL-based data layer** to collect and analyze machine metrics including **runtime, efficiency, and operational cost**.
- Implemented data aggregation and reporting logic to provide actionable insights for identifying performance inefficiencies.

Extra-Curriculars

Project Manager Sep. 2026 - Present
Queen's Sports Analytics Organization *Kingston, ON*

- Lead a team of **6** football analysts, directing milestones and sprints and extracting usable data for published articles
- Host **biweekly meetings** and conduct quality assurance reviews of drafts to ensure clarity, consistency, and **data integrity**

Orientation Sponsorships Chair Dec. 2024 - Sep. 2025
Computing Orientation Committee *Kingston, ON*

- Secured sponsors including local businesses, tech companies, and university clubs for events serving **500+ students**
- Recruited and managed **80 volunteers**, coordinating event logistics and outreach

Data Analyst Oct. 2023 - May 2024
Queen's Data Analytics Association *Kingston, ON*

- **Extracted, cleaned, and transformed data** and built a responsive front end with **HTML5 and CSS** as part of a team application

Projects

Hotel Spot | *Python, ElevenLabs, Twilio, SerpApi, Streamlit* Oct. 2026

- Built an AI voice agent with a team of 4 at the TechTO hackathon: one prompt finds the cheapest hotels in a city, **phones 3 in parallel** to check availability, and emails back the best room in **under 3 minutes**
- Owned the results layer: a **thread-safe endpoint** capturing the agent's live tool calls across concurrent calls, with a **zero-token regex extractor** for transcripts as a fallback before any LLM
- Built the email report with **Resend and Gmail SMTP failover**, attaching the call recording and validating every send, keeping a full run to **˜1,900 LLM tokens ($0.05)**

Skills

Languages (Programming): Java, Python, C, SQL, JavaScript, HTML/CSS, QL
Developer Tools: AWS, Git, VS Code, Visual Studio, PyCharm, Eclipse, Figma, Jupyter
Languages: English, French
